Installing the Thermostat

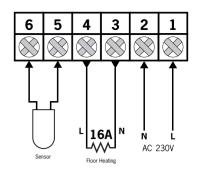

Carefully separate the front half of the thermostat from the back plate by placing a small flat head terminal driver into the slots on the bottom face of the thermostat. Carefully unplug the cable connector which is plugged into the front half of the thermostat. Place the thermostat front half somewhere safe. Follow the wiring diagram to connect the floor heating cold leads, remote temperature sensor and electrical supply to the appropriate terminals. Screw the thermostat back plate on to the electrical mounting plate. Re-connect the thermostat cable and clip the two halves together.

Technical Data

Supply voltage	220 - 240VAC	
Maximum load	16A	
IP Rating	IP20	
Warranty	2 Years	
Width	80mm	
Height	120mm	
Depth	45mm (27mm in wall)	
Temperature Range	5°C - 35°C	
Floor Sensor	10Ω	
Resistance at 25°C		
Orientation	Portrait
